

Health and safety as standard with great airflow in 4 kW

T40W generates a great airflow and is the ideal tool to collect high quantities of very fine dust. The M and H class filters grant a safe dust containment. The ATEX certification allows to work safely in explosion-proof areas.

Ideal to be used in companies producing high quantities of very fine dust, model T40WPlus is available in several configurations: with M class filter or with HEPA upstream or ULPA downstream absolute filter for the collection of very fine or hazardous dust, with cartridges filter and jet pulse cleaning system, with 50 or 100 liters container, with solid cut-off system and so on. ATEX versions can work in zone 22-21-2 in compliance with directives 94/9/EC and 99/92/EC.

Picture shown may not represent model quoted

- Manual or electric filter shaker version
- Jet pulse cartridge filter cleaning system version
- Vacuumeter
- L and H class versions
- ATEX version for zone 22-21 and 2
- Plug with inverter
