

InfiniClean

Endless filtration for your industrial vacuum

InfiniClean does not need your touch, nor an extra power source to clean your vacuum filter...

- Simply turn the vacuum on!

Nilfisk InfiniClean is an innovative automatic and stand-alone cartridge filter cleaning system. InfiniClean allows your industrial vacuum to have a consistently clean filter, you don't have to stop what you are doing to clean the filter and you don't need compressed air or other power sources. InfiniClean works automatically for you... silently! Save time and money and assure a dust-free working environment, get InfiniClean for your Nilfisk industrial vacuum*!

The InfiniClean system cleans the cartridge filters periodically and sequentially without impacting the suction. The single cartridge filter is backwashed through the clean exhaust air from the blower.

- Extremely silent
- Fully automatic and stand-alone: just turn the vacuum on
- Top filtering efficiency
- Top productivity
- No need for external compressed air or other extra power source
- Compact design
