

Gas powered stationary hot water high pressure washers

Gas powered stationary heating for maximum efficiency in the automotive, industrial sectors or other sites possessing a gas supply line, avoiding need to provide diesel fuel supply.

The SH SOLAR G line is equipped with the well known EcoPower coil and with an efficient one stage gas burner with a high heating effect. This brings you hotter water at the lowest possible cost. At a setting of 60°C, the boiler will be in Eco mode, consuming less fuel and offering lower temperatures. At full power, the boiler offers significantly hotter water, thus reducing cleaning time for tasks involving oils, and greases. The clean burning also reduces service costs.

The SH SOLAR G is an easy to use unit with simple control panel on the machine and possibility to activate from a distance.

The integrated PLC enables machines to be personalised with a range of factory mounted options.

- Expandable control technology with PLC and special options
- Automatic diagnosis and fault finding
- Efficient gas heating systems
- Galvanised steel frame and cabinet
- Reduced running and service costs
- Compact and easy to install

• Standard equipment
